

Datasheet for ABIN5652062 ABCA3 ELISA Kit

Overview

Quantity:	96 tests
Target:	ABCA3
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	78.12 pg/mL - 5000 pg/mL
Minimum Detection Limit:	78.12 pg/mL
Application:	ELISA

Product Details

Sample Type:	Tissue Homogenate	
Analytical Method:	Quantitative	
Detection Method:	Colorimetric	
Specificity:	This assay has high sensitivity and excellent specificity for detection of ATP Binding Cassette Transporter A3 (ABCA3). No significant cross-reactivity or interference between ATP Binding Cassette Transporter A3 (ABCA3) and analogues was observed.	
Sensitivity:	33 pg/mL	
Target Details		
Target:	ABCA3	
Alternative Name:	ATP Binding Cassette Transporter A3 (ABCA3 Products)

Target Details		
Background:	Gene Name: ATP Binding Cassette Transporter A3	
	Gene Aliases: ABC-A3, ABC-C, ABC3, ABC-C transporter	
Gene ID:	21	
UniProt:	Q99758	
Application Details		
Comment:	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than	
	5 % within the expiration date under appropriate storage condition. To minimize extra influence	
	on the performance, operation procedures and lab conditions, especially room temperature, air	
	humidity, incubator temperature should be strictly controlled. It is also strongly suggested that	
	the whole assay is performed by the same operator from the beginning to the end.	
Assay Time:	3 h	
Plate:	Pre-coated	
Protocol:	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate	
	provided in this kit has been pre-coated with an antibody specific to ATP Binding Cassette	
	Transporter A3 (ABCA3). Standards or samples are then added to the appropriate microtiter	
	plate wells with a biotin-conjugated antibody specific to ATP Binding Cassette Transporter A3	
	(ABCA3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate	
	well and incubated. After TMB substrate solution is added, only those wells that contain ATP	
	Binding Cassette Transporter A3 (ABCA3), biotin-conjugated antibody and enzyme-conjugated	
	Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the	
	addition of sulphuric acid solution and the color change is measured spectrophotometrically at	
	a wavelength of 450nm \pm 10nm. The concentration of ATP Binding Cassette Transporter A3	
	(ABCA3) in the samples is then determined by comparing the O.D. of the samples to the	
	standard curve.	
Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level ATP	
	Binding Cassette Transporter A3 (ABCA3) were tested 20 times on one plate, respectively	
	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level	
	ATP Binding Cassette Transporter A3 (ABCA3) were tested on 3 different plates, 8 replicates in	
	each plate. CV(%) = SD/meanX100	
	Intra-Assay: CV<10%	
	Inter-Assay: CV<12%	
Restrictions:	For Research Use only

Handling Advice:	The Stop Solution is acidic. Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be assayed in duplicate. Once the procedure has been started, all steps should be completed without interruption.
Storage:	4 °C,-20 °C
Storage Comment:	-20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles.
Expiry Date:	4-8 months
