

## Datasheet for ABIN5655822 IL17C CLIA Kit

Overview

| Quantity:                | 96 tests                 |
|--------------------------|--------------------------|
| Target:                  | IL17C                    |
| Reactivity:              | Human                    |
| Method Type:             | Sandwich ELISA           |
| Detection Range:         | 15.62 pg/mL - 1000 pg/mL |
| Minimum Detection Limit: | 15.62 pg/mL              |
| Application:             | ELISA                    |

## Product Details

| Sample Type:       | Plasma, Serum   |
|--------------------|---|
| Analytical Method: | Quantitative  |
| Detection Method:  | Chemiluminescent  |
| Specificity:       | This assay has high sensitivity and excellent specificity for detection of Interleukin 17C (IL17C).<br>No significant cross-reactivity or interference between Interleukin 17C (IL17C) and analogues<br>was observed. |
| Sensitivity:       | 0.64 pg/mL  |
| Target Details     |   |
| Target:            | IL17C   |
| Alternative Name:  | Interleukin 17C (IL17C Products)  |

| Doolyground         | Cono Name: Interlautin 170  |
|---------------------|---|
| Background:         | Gene Name: Interleukin 17C<br>Gene Aliases: Cytokine CX2  |
|                     |   |
| Gene ID:            | 27189   |
| UniProt:            | Q9P0M4  |
| Pathways:           | Cellular Response to Molecule of Bacterial Origin   |
| Application Details |   |
| Comment:            | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than |
|                     | 5 % within the expiration date under appropriate storage condition. To minimize extra influence         |
|                     | on the performance, operation procedures and lab conditions, especially room temperature, air           |
|                     | humidity, incubator temperature should be strictly controlled. It is also strongly suggested that       |
|                     | the whole assay is performed by the same operator from the beginning to the end.                        |
| Assay Time:         | 2 - 3 h   |
| Plate:              | Pre-coated  |
| Protocol:           | The microplate provided in this kit has been pre-coated with an antibody specific to Interleukin        |
|                     | 17C (IL17C). Standards or samples are then added to the appropriate microplate wells with a             |
|                     | biotin-conjugated antibody specific to Interleukin 17C (IL17C). Next, Avidin conjugated to              |
|                     | Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the                   |
|                     | mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate              |
|                     | development, the intensity of the emitted light is proportional to the Interleukin 17C (IL17C) leve     |
|                     | in the sample or standard.,   |
| Assay Precision:    | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level            |
|                     | Interleukin 17C (IL17C) were tested 20 times on one plate, respectively                                 |
|                     | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level             |
|                     | Interleukin 17C (IL17C) were tested on 3 different plates, 8 replicates in each plate. CV(%) =          |
|                     | SD/meanX100   |
|                     | Intra-Assay: CV<10%   |
|                     | Inter-Assay: CV<12%   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Handling Advice:    | Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be              |

|                  | assayed in duplicate. Once the procedure has been started, all steps should be completed without interruption.   |
|------------------|--|
| Storage:         | 4 °C,-20 °C  |
| Storage Comment: | -20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles. |
| Expiry Date:     | 4-8 months   |
