

Datasheet for ABIN5657284

Neurogranin ELISA Kit

Overview

Quantity:	96 tests
Target:	Neurogranin (NRGN)
Reactivity:	Human
Method Type:	Competition ELISA
Detection Range:	123.5 pg/mL - 10000 pg/mL
Minimum Detection Limit:	123.5 pg/mL
Application:	ELISA

Product Details

Sample Type:	Cell Lysate, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Neurogranin (NRGN). No significant cross-reactivity or interference between Neurogranin (NRGN) and analogues was observed.
Sensitivity:	54.2 pg/mL

Target Details

Target:	Neurogranin (NRGN)
Alternative Name:	Neurogranin (NRGN Products)

Target Details

Background:	Gene Name: Neurogranin
	Gene Aliases: Ng, NEUG, Protein Kinase C Substrate RC3
Gene ID:	4900
UniProt:	Q92686
Application Details	
Comment:	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than
	5 % within the expiration date under appropriate storage condition. To minimize extra influence
	on the performance, operation procedures and lab conditions, especially room temperature, air
	humidity, incubator temperature should be strictly controlled. It is also strongly suggested that
	the whole assay is performed by the same operator from the beginning to the end.
Assay Time:	2 h
Plate:	Pre-coated
Protocol:	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal
	antibody specific to Neurogranin (NRGN) has been pre-coated onto a microplate. A competitive
	inhibition reaction is launched between biotin labeled Neurogranin (NRGN) and unlabeled
	Neurogranin (NRGN) (Standards or samples) with the pre-coated antibody specific to
	Neurogranin (NRGN). After incubation the unbound conjugate is washed off. Next, avidin
	conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated.
	The amount of bound HRP conjugate is reverse proportional to the concentration of
	Neurogranin (NRGN) in the sample. After addition of the substrate solution, the intensity of
	color developed is reverse proportional to the concentration of Neurogranin (NRGN) in the
	sample.
Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level
	Neurogranin (NRGN) were tested 20 times on one plate, respectively
	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level
	Neurogranin (NRGN) were tested on 3 different plates, 8 replicates in each plate. CV(%) =
	SD/meanX100
	Intra-Assay: CV<10%
	Inter-Assay: CV<12%
Restrictions:	For Research Use only

Handling

Handling Advice:	The Stop Solution is acidic. Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be assayed in duplicate. Once the procedure has been started, all steps should be completed without interruption.
Storage:	4 °C,-20 °C
Storage Comment:	-20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles.
Expiry Date:	4-8 months
