

Datasheet for ABIN5658200

PDIA2 ELISA Kit

Overview

| Quantity: | 96 tests |
|--------------------------|------------------------|
| Target: | PDIA2 |
| Reactivity: | Mouse |
| Method Type: | Sandwich ELISA |
| Detection Range: | 0.156 ng/mL - 10 ng/mL |
| Minimum Detection Limit: | 0.156 ng/mL |
| Application: | ELISA |

Product Details

| Sample Type: | Tissue Homogenate |
|--------------------|---|
| Analytical Method: | Quantitative |
| Detection Method: | Colorimetric |
| Specificity: | This assay has high sensitivity and excellent specificity for detection of Protein Disulfide Isomerase A2 (PDIA2). No significant cross-reactivity or interference between Protein Disulfide Isomerase A2 (PDIA2) and analogues was observed. |
| Sensitivity: | 0.064 ng/mL |

Target Details

| Target: | PDIA2 |
|-------------------|---|
| Alternative Name: | Protein Disulfide Isomerase A2 (PDIA2 Products) |

Target Details

| Background: | Gene Name: Protein Disulfide Isomerase A2 |
|---------------------|---|
| | Gene Aliases: PDI-A2, PDA2, PDI, PDIR, PDIP, Protein Disulfide Isomerase, Pancreatic, Protein |
| | Disulfide Isomerase-Associated 2, Pancreas-specific protein disulfide isomerase |
| Gene ID: | 69191 |
| UniProt: | D3Z6P0 |
| Pathways: | Maintenance of Protein Location, Cell RedoxHomeostasis, Unfolded Protein Response |
| Application Details | |
| Comment: | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than |
| | 5% within the expiration date under appropriate storage condition. To minimize extra influence |
| | on the performance, operation procedures and lab conditions, especially room temperature, air |
| | humidity, incubator temperature should be strictly controlled. It is also strongly suggested that |
| | the whole assay is performed by the same operator from the beginning to the end. |
| Assay Time: | 3 h |
| Plate: | Pre-coated |
| Protocol: | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate |
| | provided in this kit has been pre-coated with an antibody specific to Protein Disulfide Isomerase |
| | A2 (PDIA2). Standards or samples are then added to the appropriate microtiter plate wells with |
| | a biotin-conjugated antibody specific to Protein Disulfide Isomerase A2 (PDIA2). Next, Avidin |
| | conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. |
| | After TMB substrate solution is added, only those wells that contain Protein Disulfide |
| | Isomerase A2 (PDIA2), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a |
| | change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid |
| | solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm |
| | 10nm. The concentration of Protein Disulfide Isomerase A2 (PDIA2) in the samples is then |
| | determined by comparing the O.D. of the samples to the standard curve. |
| Assay Precision: | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level |
| | Protein Disulfide Isomerase A2 (PDIA2) were tested 20 times on one plate, respectively |
| | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level |
| | Protein Disulfide Isomerase A2 (PDIA2) were tested on 3 different plates, 8 replicates in each |
| | plate. CV(%) = SD/meanX100 |
| | Intra-Assay: CV<10% |
| | Inter-Assay: CV<12% |

Application Details

| Restrictions: | For Research Use only |
|------------------|---|
| Handling | |
| Handling Advice: | The Stop Solution is acidic. Do not allow to contact skin or eyes. Calibrators, controls and |
| | specimen samples should be assayed in duplicate. Once the procedure has been started, all |
| | steps should be completed without interruption. |
| Storage: | 4 °C,-20 °C |
| Storage Comment: | -20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at |
| | 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant |
| | pack. Minimize freeze/thaw cycles. |
| Expiry Date: | 4-8 months |
