

Datasheet for ABIN5658473

RBP1 CLIA Kit

Overview

Quantity:	96 tests
Target:	RBP1
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.78 ng/mL - 200 ng/mL
Minimum Detection Limit:	0.78 ng/mL
Application:	ELISA

Product Details

Sample Type:	Plasma, Serum, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Chemiluminescent
Specificity:	This assay has high sensitivity and excellent specificity for detection of Retinol Binding Protein 1, Cellular (RBP1). No significant cross-reactivity or interference between Retinol Binding Protein 1, Cellular (RBP1) and analogues was observed.
Sensitivity:	0.12 ng/mL

Target Details

Target:	RBP1
Alternative Name:	Retinol Binding Protein 1, Cellular (RBP1 Products)

Background:	Gene Name: Retinol Binding Protein 1, Cellular
background.	Gene Aliases: RBP-1, CRABP-I, CRBP, CRBP1, RBPC, Cellular retinol-binding protein I
Gene ID:	5947
UniProt:	P09455
Application Details	
Comment:	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than
	5 % within the expiration date under appropriate storage condition. To minimize extra influence
	on the performance, operation procedures and lab conditions, especially room temperature, ai
	humidity, incubator temperature should be strictly controlled. It is also strongly suggested that
	the whole assay is performed by the same operator from the beginning to the end.
Assay Time:	2 - 3 h
Plate:	Pre-coated
Protocol:	The microplate provided in this kit has been pre-coated with an antibody specific to Retinol
	Binding Protein 1, Cellular (RBP1). Standards or samples are then added to the appropriate
	microplate wells with a biotin-conjugated antibody specific to Retinol Binding Protein 1, Cellula
	(RBP1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate
	well and incubated. Then the mixture of substrate A and B is added to generate glow light
	emission kinetics. Upon plate development, the intensity of the emitted light is proportional to
	the Retinol Binding Protein 1, Cellular (RBP1) level in the sample or standard.,
Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level
	Retinol Binding Protein 1, Cellular (RBP1) were tested 20 times on one plate, respectively
	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level
	Retinol Binding Protein 1, Cellular (RBP1) were tested on 3 different plates, 8 replicates in each
	plate. CV(%) = SD/meanX100
	Intra-Assay: CV<10%
	Inter-Assay: CV<12%
Restrictions:	For Research Use only
Handling	

Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be

assayed in duplicate. Once the procedure has been started, all steps should be completed

Handling Advice:

Handling

	without interruption.
Storage:	4 °C,-20 °C
Storage Comment:	-20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles.
Expiry Date:	4-8 months
