

## Datasheet for ABIN5658485 ROCK2 ELISA Kit

Go to Product page

Overview

Quantity:	96 tests
Target:	ROCK2
Reactivity:	Human, Rat, Mouse
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA

## Product Details

Sample Type:	Cell Culture Supernatant, Cell Lysate, Plasma, Serum, Tissue Homogenate	
Analytical Method:	Quantitative	
Detection Method:	Colorimetric	
Specificity:	This assay has high sensitivity and excellent specificity for detection of Rho Associated Coiled Coil Containing Protein Kinase 2 (Rock2). No significant cross-reactivity or interference between Rho Associated Coiled Coil Containing Protein Kinase 2 (Rock2) and analogues was observed.	
Sensitivity:	0.119 ng/mL	

## Target Details

Target:	ROCK2	
Alternative Name:	Rho Associated Coiled Coil Containing Protein Kinase 2 (ROCK2 Products)

Target Details		
Background:	Gene Name: Rho Associated Coiled Coil Containing Protein Kinase 2	
Pathways:	Microtubule Dynamics, WNT Signaling, Tube Formation	
Application Details		
Comment:	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than	
	5 % within the expiration date under appropriate storage condition. To minimize extra influence	
	on the performance, operation procedures and lab conditions, especially room temperature, air	
	humidity, incubator temperature should be strictly controlled. It is also strongly suggested that	
	the whole assay is performed by the same operator from the beginning to the end.	
Assay Time:	3 h	
Plate:	Pre-coated	
Protocol:	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate	
	provided in this kit has been pre-coated with an antibody specific to Rho Associated Coiled Coil	
	Containing Protein Kinase 2 (Rock2). Standards or samples are then added to the appropriate	
	microtiter plate wells with a biotin-conjugated antibody specific to Rho Associated Coiled Coil	
	Containing Protein Kinase 2 (Rock2). Next, Avidin conjugated to Horseradish Peroxidase (HRP)	
	is added to each microplate well and incubated. After TMB substrate solution is added, only	
	those wells that contain Rho Associated Coiled Coil Containing Protein Kinase 2 (Rock2), biotin-	
	conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-	
	substrate reaction is terminated by the addition of sulphuric acid solution and the color change	
	is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of	
	Rho Associated Coiled Coil Containing Protein Kinase 2 (Rock2) in the samples is then	
	determined by comparing the O.D. of the samples to the standard curve.	
Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Rho	
	Associated Coiled Coil Containing Protein Kinase 2 (Rock2) were tested 20 times on one plate,	
	respectively	
	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level	
	Rho Associated Coiled Coil Containing Protein Kinase 2 (Rock2) were tested on 3 different	
	plates, 8 replicates in each plate. CV(%) = SD/meanX100	
	Intra-Assay: CV<10%	
	Inter-Assay: CV<12%	
Restrictions:	For Research Use only

Handling Advice:	The Stop Solution is acidic. Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be assayed in duplicate. Once the procedure has been started, all steps should be completed without interruption.
Storage:	4 °C,-20 °C
Storage Comment:	-20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles.
Expiry Date:	4-8 months
