

## Datasheet for ABIN5659703 TWSG1 ELISA Kit

Overview

Quantity:	96 tests
Target:	TWSG1
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA

## Product Details

Sample Type:	Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Twisted Gastrulation Protein Homolog 1 (TWSG1). No significant cross-reactivity or interference between Twisted Gastrulation Protein Homolog 1 (TWSG1) and analogues was observed.
Sensitivity:	0.122 ng/mL
Target Details	

Target:	TWSG1
Alternative Name:	Twisted Gastrulation Protein Homolog 1 (TWSG1 Products)

Target Details		
Background:	Gene Name: Twisted Gastrulation Protein Homolog 1	
	Gene Aliases: TSG	
Gene ID:	57045	
UniProt:	Q9GZX9	
Application Details		
Comment:	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than	
	5 % within the expiration date under appropriate storage condition. To minimize extra influence	
	on the performance, operation procedures and lab conditions, especially room temperature, air	
	humidity, incubator temperature should be strictly controlled. It is also strongly suggested that	
	the whole assay is performed by the same operator from the beginning to the end.	
Assay Time:	3 h	
Plate:	Pre-coated	
Protocol:	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate	
	provided in this kit has been pre-coated with an antibody specific to Twisted Gastrulation	
	Protein Homolog 1 (TWSG1). Standards or samples are then added to the appropriate	
	microtiter plate wells with a biotin-conjugated antibody specific to Twisted Gastrulation Protein	
	Homolog 1 (TWSG1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to	
	each microplate well and incubated. After TMB substrate solution is added, only those wells	
	that contain Twisted Gastrulation Protein Homolog 1 (TWSG1), biotin-conjugated antibody and	
	enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is	
	terminated by the addition of sulphuric acid solution and the color change is measured	
	spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Twisted	
	Gastrulation Protein Homolog 1 (TWSG1) in the samples is then determined by comparing the	
	O.D. of the samples to the standard curve.	
Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level	
	Twisted Gastrulation Protein Homolog 1 (TWSG1) were tested 20 times on one plate,	
	respectively	
	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level	
	Twisted Gastrulation Protein Homolog 1 (TWSG1) were tested on 3 different plates, 8 replicates	
	in each plate. CV(%) = SD/meanX100	
	Intra-Assay: CV<10%	
	Inter-Assay: CV<12%

Application Details	
Restrictions:	For Research Use only
Handling	
Handling Advice:	The Stop Solution is acidic. Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be assayed in duplicate. Once the procedure has been started, all steps should be completed without interruption.
Storage:	4 °C,-20 °C
Storage Comment:	-20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles.
Expiry Date:	4-8 months
