

Datasheet for ABIN5660082 **ZNRD1 CLIA Kit**

Overview

Quantity:	96 tests
Target:	ZNRD1
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	156.25 pg/mL - 10000 pg/mL
Minimum Detection Limit:	156.25 pg/mL
Application:	ELISA

Product Details

Alternative Name:

Sample Type:	Tissue Homogenate
Запріє туре.	Hoode Holhogenale
Analytical Method:	Quantitative
Detection Method:	Chemiluminescent
Specificity:	This assay has high sensitivity and excellent specificity for detection of Zinc Ribbon Domain
	Containing Protein 1 (ZNRD1). No significant cross-reactivity or interference between Zinc
	Ribbon Domain Containing Protein 1 (ZNRD1) and analogues was observed.
Sensitivity:	5.94 pg/mL
Target Details	
Target:	ZNRD1

Zinc Ribbon Domain Containing Protein 1 (ZNRD1 Products)

Target Details	
Background:	Gene Name: Zinc Ribbon Domain Containing Protein 1
	Gene Aliases: HTEX-6, Rpa12, hZR14, Tctex-6, DNA-directed RNA polymerase I subunit RPA12
Gene ID:	30834
UniProt:	Q9P1U0
Application Details	
Comment:	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than
	5 % within the expiration date under appropriate storage condition. To minimize extra influence
	on the performance, operation procedures and lab conditions, especially room temperature, air
	humidity, incubator temperature should be strictly controlled. It is also strongly suggested that
	the whole assay is performed by the same operator from the beginning to the end.
Assay Time:	2 - 3 h
Plate:	Pre-coated
Protocol:	The microplate provided in this kit has been pre-coated with an antibody specific to Zinc Ribbon
	Domain Containing Protein 1 (ZNRD1). Standards or samples are then added to the appropriate
	microplate wells with a biotin-conjugated antibody specific to Zinc Ribbon Domain Containing
	Protein 1 (ZNRD1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each
	microplate well and incubated. Then the mixture of substrate A and B is added to generate glow
	light emission kinetics. Upon plate development, the intensity of the emitted light is proportional
	to the Zinc Ribbon Domain Containing Protein 1 (ZNRD1) level in the sample or standard.,
Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level
	Zinc Ribbon Domain Containing Protein 1 (ZNRD1) were tested 20 times on one plate,
	respectively
	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level
	Zinc Ribbon Domain Containing Protein 1 (ZNRD1) were tested on 3 different plates, 8
	replicates in each plate. CV(%) = SD/meanX100
	Intra-Assay: CV<10%
	Inter-Assay: CV<12%
Restrictions:	For Research Use only
Handling	
Handling Advice:	Do not allow to contact skin or eyes. Calibrators, controls and specimen samples should be

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/3 | Product datasheet for ABIN5660082 | 07/25/2024 | Copyright antibodies-online. 	assayed in duplicate. Once the procedure has been started, all steps should be completed without interruption.
Storage:	4 °C,-20 °C
Storage Comment:	-20°C. Bring all reagents to room temperature before beginning test. The kit may be stored at 4°C for immediate use within two days upon arrival. Reseal any unused strips with desiccant pack. Minimize freeze/thaw cycles.
Expiry Date:	4-8 months
