Product Details

Immunogen:	4E-BP1 (Ab-45) antibody was raised against a peptide sequence around aa.43~47 (S-T-T-P-G) derived from Human 4E-BP1.
Specificity:	This antibody detects endogenous level of total 4E-BP1 protein.
Purification:	Antibodies were purified by affinity-chromatography using epitope-specific peptide.

Target Details

Target:	eIF4EBP1 (EIF4EBP1)
Alternative Name:	4E BP1 (EIF4EBP1 Products)
Background:	4E-BP1 encodes one member of a family of translation repressor proteins. The protein directly interacts with eukaryotic translation initiation factor 4E (eIF4E), which is a limiting component of the multisubunit complex that recruits 40S ribosomal subunits to the 5' end of mRNAs.

Target Details

	Interaction of this protein with eIF4E inhibits complex assembly and represses translation. This protein is phosphorylated in response to various signals including UV irradiation and insulin signaling, resulting in its dissociation from eIF4E and activation of mRNA translation.
Molecular Weight:	18 kDa
Gene ID:	1978
