Product Details

Immunogen:	GPRASP1 antibody was raised against a 15 amino acid peptide near the amino terminus of human GPRASP1. The immunogen is located within amino acids 260 - 310 of GPRASP1.
Isotype:	IgG
Specificity:	GPRASP1 antibody is human and mouse reactive. This antibody is predicted to not cross-react with GPRASP2.
Purification:	GPRASP1 antibody is affinity chromatography purified via peptide column.

Target Details

Target:	SKIV2L
Alternative Name:	SKI2W (SKIV2L Products)
Background:	The G protein-coupled receptor associated sorting protein 1 (GPRASP1) is a member of the GPRASP family and is thought to modulate lysosomal sorting and functional down-regulation of a variety of G-protein coupled receptors (1,2). GPRASP1 interacts with receptors such as the D2 dopamine receptor (DRD2), delta opioid receptor (OPRD1), beta-2 adrenergic receptor (ADRB2), D4 dopamine receptor (DRD4) and cannabinoid 1 receptor (CNR1) and targets these proteins for degradation in lysosomes (2). Recently, it has been shown that increased GPRASP1 levels may act as a potential biomarker for breast cancer (3).
