Datasheet for ABIN5692011
Heregulin beta 1 ELISA Kit

Overview

Quantity:	96 tests
Target:	Heregulin beta 1
Reactivity:	Human
Method Type:	Sandwich ELISA
Application:	ELISA

Product Details

Brand:	OmniKine™
Sample Type:	Cell Culture Supernatant, Cell Lysate, Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Characteristics:	Detection of proteins from pg/mL to ng/mL concentrations - Convenient and ready-to-use - High-sensitivity, low background with exceptional signal-to-noise ratio - 450 nm colorimetric detection - Human, mouse and rat targets - For use with cell lysates, supernatants, sera and plasma
Components:	12x 8-Well Capture Antibody Coated Microstrips, Recombinant Protein Standard, Biotin-Conjugated Detection Antibody, 10x Wash Buffer, Protein Standard Diluent, Sample Diluent, Detection Antibody Diluent, Ready-to-Use Streptavidin-HRP, Ready-to-Use Substrate, Stop Solution, Adhesive Plate Seals, Technical Manual

Target Details

Target: Heregulin beta 1

Alternative Name: Heregulinbeta-1 ([Heregulin beta 1 Products](#))

Application Details

Plate: Pre-coated

Restrictions: For Research Use only
