## **Application Details**

Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Handling Advice:	Affinity purified antibodies are less robust than antisera, since protease inhibitors are also removed during purification. Hence, storage at 4 °C for prolonged periods (i.e. several weeks), is not recommended.
Storage:	-20 °C
Storage Comment:	Unlabeled lyophilized antibodies are stable in this form without loss of quality at ambient temperatures for several weeks or even months. They can be stored at 4°C for several years.  Lyophilized antibodies must not be stored in the freezer, they may be destroyed!
