Target Details

Target:	WFDC2
Alternative Name:	Wfdc2 (WFDC2 Products)
Background:	<p>Synonyms: WAP four-disulfide core domain protein 2, Epididymal secretory protein 4, RE4, Wfdc2</p> <p>Background: WAP four-disulfide core domain protein 2, also known as Human Epididymis Protein 4 (HE4), is a protein that in humans is encoded by the WFDC2 gene. This gene encodes a protein that is a member of the WFDC domain family. The WFDC domain, or WAP Signature motif, contains eight cysteines forming four disulfide bonds at the core of the protein, and functions as a protease inhibitor in many family members. This gene is expressed in pulmonary epithelial cells, and was also found to be expressed in some ovarian cancers. The encoded protein is a small secretory protein, which may be involved in sperm maturation.</p> <p>Cellular Localisation: Secreted.</p>
