Datasheet for ABIN5706384 Express Transfer Buffer

Overview

Quantity:	1 L
Application:	Western Blotting (WB)

Product Details

Purification:	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
Sterility:	Aseptic filtered

Application Details

Application Notes:	Application Note: Express Transfer Buffer is a alternative to tris-glycine as a transfer buffer in the western blot. It may run at an elevated temperature but gives markedly lower background. Western Blot Dilution: User Optimized
Comment:	Synonyms: Carbonate Buffer, Western Blot Buffer, non-tris-glycine buffer Background: Western Blotting is the method used for immunodetection for the detection of proteins. Blotting is a method for transferring biological molecules (e.g., proteins, nucleic acid fragments) from a gel matrix to a membrane support for the subsequent detection of those molecules.
Restrictions:	For Research Use only

Handling

Format:	Liquid
---------	--------

Handling

Concentration:	1 X
Buffer:	Stabilizer: None
Preservative:	Without preservative
Storage:	RT,4 °C
Expiry Date:	3 months
