

Datasheet for ABIN5706892 Rabbit anti-Llama IgG2 Antibody

Overview

0.5 mg		
lgG2		
Llama		
Rabbit		
Polyclonal		
ELISA, Western Blotting (WB), Immunohistochemistry (IHC)		
Immunogen: Llama IgG2		
Immunogen Type: Native Protein		
lgG		
Synonyms: IgG2 antibody, Llama IgG2, anti-subclass secondary antibody		
Background: Camelids produce functional IgG isotypes that do not incorporate light chains.		
Comparative studies of old world camelids (Camelus bactrianus and Camelus dromedarius)		
and new world camelids (Lama pacos, Lama glama and Lama vicugna) have shown that heavy-		
chain-only immunoglobulins represent between 35 % - 70 % of total IgG in the sera of all		
species. At present, three subclasses of camelid IgG have been identified (IgG1, IgG2, IgG3), of		
which IgG2 and IgG3 lack the light chains. IgG2 consists of dimers of short heavy chains, which		
are characterized by a normal Fc region without a CH1 domain. IgG2 shows a molecular weight		
of approximately 90 kDa and this smaller size improves its bio-distribution and allows a better		
tissue penetration. Of special importance is the long complementary determining region (CDR)

	an enzyme. Anti-Llama IgG2 generated in rabbit detects specifically Llama IgG2 isotype. Th		
	anti-Llama secondary Antibody is suitable for western blot, ELISA, ChIP and		
	immunohistochemistry as well as other more general immunoassays.		
Purification:	Anti-Llama IgG2 antibody is directed against Llama IgG2a, IgG2b, and IgG2c isotypes with		
	minimal cross-reactivity to Llama IgG3 and Llama IgG1. Anti-Llama IgG2 antibody was		
	prepared from monospecific antiserum by immunoaffinity chromatography. Assay by		
	immunoelectrophoresis resulted in a single precipitin arc against Llama IgG2 and Llama Serum.		
	No reaction was observed against Llama IgG1, and Llama IgG3. This antibody does not		
	recognize recombinant VHH with IgG3 background.		

Target Details

Target:	lgG2					
Abstract:	IgG2 Products				IgG2 Products	
Target Type:	Antibody					
Application Details						
Application Notes:	Immunohistochemistry Dilution: User Optimized					
	Application Note: Antibody Anti-Llama IgG2 is suitable for immunoblotting (western or dot blot),					
	ELISA, and immunohistochemistry assays requiring lot-to-lot consistency.					
	Western Blot Dilution: 1:10,000-1:50,000					
	ELISA Dilution: 1:60,000					
Restrictions:	For Research Use only					
Handling						
Format:	Liquid					
Concentration:	1.0 mg/mL					
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2					

Bullet:	burrer. 0.02 in rotassiant hospitate, 0.15 in social officiate, pr7.2			
	Stabilizer: None			
Preservative:	Sodium azide			
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which			
	should be handled by trained staff only.
