Application Details

Application Notes:	Immunohistochemistry: Paraffin embedded Human Spleen. Recommended concentration: 3.75 µg/mL. Western Blot: Preliminary experiments gave an approx 80 kDa band in Human Heart and Mouse Heart lysates after 0.5 µg/mL antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calcula Peptide ELISA: antibody detection limit dilution 1:8000.
