

Datasheet for ABIN5775820
CKM Protein

[Go to Product page](#)

Overview

Quantity:	100 units
Target:	CKM
Origin:	Human
Source:	Human
Protein Type:	Native
Biological Activity:	Active

Product Details

Protein Source:	Human Skeletal Muscle
Characteristics:	Highly pure native Human CKMM protein
Purity:	> 99 % pure
Biological Activity Comment:	> 100 U/mg. One unit will catalyze the transphosphorylation of one micromole of phosphate from creatine phosphate to ADP per minute at 37 deg C.

Target Details

Target:	CKM
Alternative Name:	CKMM (CKM Products)

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Buffer:	Supplied lyophilized from tris chloride, EDTA and sodium chloride
Storage:	4 °C/-20 °C
Storage Comment:	Store at 2-8 deg C for short term storage. For long term storage aliquot and store at -20 deg C
