	family and catalyzes the conversion of ATP and D-gluconate to ADP and 6-phospho-D-
	gluconate. This protein is thought to play a role in gender determination, deletion of the distal
	portion of 9p can lead to development of male to female sex reversal, the phenotype of a
	female with a male X, Y genotype. Recombinant E.coli idnk protein, fused to His-tag at N-
	terminus, was expressed in E.coli and purified by using conventional chromatography
	techniques.
