Datasheet for ABIN594856  
**anti-EBNA antibody**

### Overview

|              |                                     |
|--------------|-------------------------------------|
| Quantity:    | 100 µg                              |
| Target:      | EBNA                                |
| Reactivity:  | Epstein-Barr Virus (EBV)            |
| Host:        | Mouse                               |
| Clonality:   | Monoclonal                          |
| Conjugate:   | This EBNA antibody is un-conjugated |
| Application: | ELISA                               |

### Product Details

|               |                    |
|---------------|--------------------|
| Immunogen:    | EBNA-1.            |
| Isotype:      | IgG2b              |
| Specificity:  | Recognizes EBNA-1. |
| Purification: | Protein A purified |

### Target Details

|                   |  |
|-------------------|--|
| Target:           | EBNA   |
| Alternative Name: | EBV Nuclear Antigen / EBNA ( <a href="#">EBNA Products</a> ) |
| Target Type:      | Viral Protein  |

## Application Details

---

|                    |  |
|--------------------|--|
| Application Notes: | Approved: ELISA                                |
|                    | Usage: Suitable for use in ELISA.              |
| Comment:           | Target Species of Antibody: Epstein-Barr Virus |
| Restrictions:      | For Research Use only                          |

## Handling

---

|                    |   |
|--------------------|---|
| Format:            | Liquid  |
| Concentration:     | Lot specific  |
| Buffer:            | PBS, pH 7.4, 0.09 % sodium azide  |
| Preservative:      | Sodium azide  |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.  |
| Handling Advice:   | Avoid repeated freezing and thawing   |
| Storage:           | 4 °C, -20 °C  |
| Storage Comment:   | May be stored at 4°C for short-term only. For long-term storage and to avoid freeze-thaw cycles, add sterile 40-50% glycerol, aliquot and store at -20°C. Aliquots are stable for at least 1 year at -20°C. |
