## Overview

|                      |                                                                                                     |
|----------------------|-----------------------------------------------------------------------------------------------------|
| Quantity:            | 100 µL                                                                                              |
| Target:              | IL4I1                                                                                               |
| Binding Specificity: | AA 139-339                                                                                          |
| Reactivity:          | Human, Mouse                                                                                        |
| Host:                | Rabbit                                                                                              |
| Clonality:           | Polyclonal                                                                                          |
| Conjugate:           | This IL4I1 antibody is un-conjugated                                                                |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunofluorescence (fixed cells) (IF/ICC) |

## Product Details

|               |                                                             |
|---------------|-------------------------------------------------------------|
| Immunogen:    | Recombinant human L-amino-acid oxidase protein (139-339AA). |
| Isotype:      | IgG                                                         |
| Purification: | Protein G                                                   |

## Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | IL4I1                                    |
| Alternative Name: | IL4I1 ( <a href="#">IL4I1 Products</a> ) |
| Gene ID:          | 259307                                   |
| UniProt:          | <a href="#">Q96RQ9</a>                   |

## Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
|--------------------|--------------------------------------------------------------------|

|               |                       |
|---------------|-----------------------|
| Restrictions: | For Research Use only |
|---------------|-----------------------|

## Handling

|         |        |
|---------|--------|
| Format: | Liquid |
|---------|--------|

|         |                                                           |
|---------|-----------------------------------------------------------|
| Buffer: | 0.01 M PBS, pH 7.4, 0.03 % Proclin-300 and 50 % Glycerol. |
|---------|-----------------------------------------------------------|

|               |         |
|---------------|---------|
| Preservative: | ProClin |
|---------------|---------|

|                    |                                                                                                                   |
|--------------------|-------------------------------------------------------------------------------------------------------------------|
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
|--------------------|-------------------------------------------------------------------------------------------------------------------|

|          |               |
|----------|---------------|
| Storage: | -20 °C,-80 °C |
|----------|---------------|

|                  |                                                                           |
|------------------|---------------------------------------------------------------------------|
| Storage Comment: | Aliquot and store at -20 °C or -80 °C. Avoid repeated freeze/thaw cycles. |
|------------------|---------------------------------------------------------------------------|
