Overview	
Quantity:	1 mg
Target:	IgM
Binding Specificity:	Chain mu
Reactivity:	Human
Host:	Goat
Conjugate:	DyLight 594
Application:	Flow Cytometry (FACS), Immunofluorescence (IF)
Product Details	
Immunogen:	Purified human IgM (mu chain)

Immunogen:	Purified human IgM (mu chain)	
Characteristics:	Goat anti-human IgM ( chain) - Affinity Pure, DyLight 594 Conjugate.	
	Fluorphore: DyLight 594 (Ex = 593 nm, Em = 618 nm).	
	Fluor Protein Ratio: Moles DyLight 594 per Mole Antibody.	
Purification:	Affinity purified using solid phase hamster IgG (H&L)	
Purity:	> 95 % based on SDS-PAGE	

### Target Details

Target:	IgM
Abstract:	IgM Products
Target Type:	Antibody

### **Application Details**

Application Notes:	This conjugate is suitable for immunomicroscopy, flow cytometry.	
	The optimal working dilution should be determined by the investigator. Suggested starting	
	dilution: 1:20 - 1:2,000 for most applications	
Comment:	Country of Origin: Goat serum was obtained from healthy animals of US origin, under the care	
	of a registered veterinarian.	
	DyLight is a trademark of Thermo Fisher Scientific, Inc. and its subsidiaries.	
Restrictions:	For Research Use only	
Handling		
Format:	Lyophilized	
Concentration:	1.0 mg/mL	
Buffer:	10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free.	
	0.05 % (w/v) Sodium Azide	
Preservative:	Sodium azide	
Precaution of Use:	WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled.	
	Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or	
	eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a	
	physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute	
	azide-containing compounds in running water before discarding to avoid accumulation of	
	potentially explosive deposits in lead or copper plumbing.	
Handling Advice:	Product is photosensitive and should be protected from light.	
	Prepare working dilution prior to use and then discard. Be sure to mix well but without foaming.	
	A solution with 50 % glycerol will not freeze in -20 °C. If you are using a 1:5000 dilution prior to	
	diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol.	
Storage:	4 °C
