## anti-CFTR antibody (AA 258-385) (CF®405S)

[Go to Product page](#)

### Overview

|                      |                                                |
|----------------------|------------------------------------------------|
| Quantity:            | 100 µL                                         |
| Target:              | CFTR                                           |
| Binding Specificity: | AA 258-385                                     |
| Reactivity:          | Human                                          |
| Host:                | Mouse                                          |
| Clonality:           | Monoclonal                                     |
| Conjugate:           | This CFTR antibody is conjugated to CF®405S    |
| Application:         | Immunofluorescence (IF), ELISA, Coating (Coat) |

### Product Details

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:         | Mouse Monoclonal anti-CFTR CFTR/1644), CF405S Conjugate                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Immunogen:       | Recombinant human CFTR fragment (aa258-385) (exact sequence is proprietary)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Clone:           | CFTR-1644                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Isotype:         | IgG1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Characteristics: | This antibody recognizes a protein of 165-170 kDa, identified as cystic fibrosis transmembrane conductance regulator (CFTR). CFTR is composed of two membrane-spanning domains (MSD), two nucleotide-binding domains (NBD), and an R domain. It is structurally similar to multidrug resistance (Mdr1) protein and both are members of the superfamily of ATP-binding cassette (ABC) transporters, also known as traffic ATPases, which are implicated in the movement of various substrates. The CFTR protein is a small conductance adenosine 3',5'-cyclic monophosphate (cAMP)-activated chloride ion channel found in the apical membranes of |

## Product Details

epithelia within the pancreas, airway, intestine, bile duct, sweat gland, and male genital ducts. CFTR is a valuable marker of human pancreatic duct cell development and differentiation. Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.
