Product Details

Purpose:	Mouse Monoclonal anti-TRP1 (Tyrosinase Related Protein-1) (TA99 + TYRP1/807), Biotin Conjugate
Immunogen:	SK-MEL-23 cells (TA99), Recombinant full-length human TYRP1 protein (TYRP1/807)
Clone:	TA99 TYRP1-807
Isotype:	IgG
Characteristics:	This antibody reacts with a 75 kDa melanocyte-specific gene product, identified as Tyrosinase-related protein-1 (TRP-1). It is involved in melanin synthesis. TRP1 is present on the melanosomal membranes of melanoma, normal melanocytes and nevi. Recent evidence suggests that TRP-1 is involved in maintaining stability of tyrosinase protein and modulating its catalytic activity. TRP-1 is also involved in maintenance of melanosome ultrastructure and affects melanocyte proliferation and cell death. Primary antibodies are available purified, or with

a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.
