HLA-DMA ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	HLA-DMA
Reactivity:	Human
Method Type:	Competition ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA

Product Details

Purpose:	Human HLA class II histocompatibility antigen, DM alpha chain ELISA Kit is an ELISA kit against Human HLA class II histocompatibility antigen, DM alpha chain (HLA-DMA).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric

Target Details

Target:	HLA-DMA
Alternative Name:	HLA class II histocompatibility antigen, DM alpha chain (HLA-DMA Products)
Pathways:	Cancer Immune Checkpoints , Human Leukocyte Antigen (HLA) in Adaptive Immune Response

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
--------------------	---

Plate:	Pre-coated
--------	------------

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Storage:	4 °C/-20 °C
----------	-------------

Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
------------------	---

Expiry Date:	6 months
