

## Datasheet for ABIN6200786 **EDAR ELISA Kit**

[Go to Product page](#)

### Overview

Quantity: 96 tests

Target: EDAR

Reactivity: Human

Method Type: Competition ELISA

Detection Range: 0.312 ng/mL - 20 ng/mL

Minimum Detection Limit: 0.312 ng/mL

Application: ELISA

### Product Details

Purpose: Human Tumor necrosis factor receptor superfamily member EDAR ELISA Kit is an ELISA kit against Human Tumor necrosis factor receptor superfamily member EDAR (EDAR).

Sample Type: Plasma, Serum

Analytical Method: Quantitative

Detection Method: Colorimetric

### Target Details

Target: EDAR

Alternative Name: Tumor necrosis factor receptor superfamily member EDAR ([EDAR Products](#))

Pathways: [Tube Formation](#), [Ubiquitin Proteasome Pathway](#)

## Application Details

---

**Application Notes:**                      **Stability:** The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

**Recommended dilutions:** Optimal dilutions/concentrations should be determined by the end user.

---

**Plate:**    Pre-coated

---

**Restrictions:**                                      For Research Use only

---

## Handling

---

**Storage:**    4 °C/-20 °C

---

**Storage Comment:**                                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

**Expiry Date:**    6 months

---
