

Datasheet for ABIN6200908 **Thymopoietin ELISA Kit**

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	Thymopoietin (TMPO)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	0.78 ng/mL - 50 ng/mL
Minimum Detection Limit:	0.78 ng/mL
Application:	ELISA

Product Details

Purpose:	Rat Lamina-associated polypeptide 2, isoform beta ELISA Kit is an ELISA kit against Rat Lamina-associated polypeptide 2, isoform beta (Tmpe).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric

Target Details

Target:	Thymopoietin (TMPO)
Alternative Name:	Lamina-associated polypeptide 2, isoform beta (TMPO Products)

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
