## Overview

**BIN1 ELISA Kit** 

| Overview                 |   |
|--------------------------|---|
| Quantity:                | 96 tests  |
| Target:                  | BIN1  |
| Reactivity:              | Mouse   |
| Method Type:             | Sandwich ELISA  |
| Detection Range:         | 78 pg/mL - 5000 pg/mL   |
| Minimum Detection Limit: | 78 pg/mL  |
| Application:             | ELISA   |
| Product Details          |   |
| Purpose:                 | Mouse Myc box-dependent-interacting protein 1 ELISA Kit is an ELISA kit against Mouse Myc |
|                          | box-dependent-interacting protein 1 (Bin1).   |
| Sample Type:             | Plasma, Serum   |
| Analytical Method:       | Quantitative  |
| Detection Method:        | Colorimetric  |
| Target Details           |   |
| Target:                  | BIN1  |
| Alternative Name:        | Myc box-dependent-interacting protein 1 (BIN1 Products)                                   |

## **Application Details**

| Application Notes: | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less |
|--------------------|---|
|                    | than 5 % within the expiration date under appropriate storage conditions. To minimize                 |
|                    | performance fluctuations, operation procedures and lab conditions should be strictly controlled.      |
|                    | It is also strongly suggested that the whole assay is performed by the same user throughout.          |
|                    | Recommended dilutions: Optimal dilutions/concentrations should be determined by the end               |
|                    | user.   |
| Plate:             | Pre-coated  |
| Restrictions:      | For Research Use only   |
| Handling           |   |
| Storage:           | 4 °C/-20 °C   |
| Storage Comment:   | Upon receipt, store the kit according to the storage instruction in the kit's manual.                 |
| Expiry Date:       | 6 months  |
