

## Datasheet for ABIN6204202 **Ephrin B2 CLIA Kit**

[Go to Product page](#)

### Overview

|                          |                        |
|--------------------------|------------------------|
| Quantity:                | 96 tests               |
| Target:                  | Ephrin B2 (EFNB2)      |
| Reactivity:              | Mouse                  |
| Method Type:             | Sandwich ELISA         |
| Detection Range:         | 0.156 ng/mL - 10 ng/mL |
| Minimum Detection Limit: | 0.156 ng/mL            |
| Application:             | ELISA                  |

### Product Details

|                    |                                                                                                                            |
|--------------------|----------------------------------------------------------------------------------------------------------------------------|
| Purpose:           | Mouse Ephrin B2 CLIA Kit is a Sandwich CLIA Kit for use with Tissue homogenates, cell lysates and other biological fluids. |
| Sample Type:       | Cell Lysate, Tissue Homogenate                                                                                             |
| Analytical Method: | Quantitative                                                                                                               |
| Detection Method:  | Chemiluminescent                                                                                                           |
| Sensitivity:       | < 0.055 ng/mL                                                                                                              |

### Target Details

|                   |                                                                          |
|-------------------|--------------------------------------------------------------------------|
| Target:           | Ephrin B2 (EFNB2)                                                        |
| Alternative Name: | Ephrin B2 ( <a href="#">EFNB2 Products</a> )                             |
| Pathways:         | <a href="#">RTK Signaling, Regulation of Muscle Cell Differentiation</a> |

Application Details

Application Notes:                      Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Lyophilized

Plate:                                      Pre-coated

Restrictions:                            For Research Use only

Handling

Storage:                                  4 °C/-20 °C

Storage Comment:                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date:                              6 months
