

## Datasheet for ABIN6206174 **KIAA0101 ELISA Kit**

[Go to Product page](#)

### Overview

Quantity:	96 tests
Target:	KIAA0101 (PAF)
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	78 pg/mL - 5000 pg/mL
Minimum Detection Limit:	78 pg/mL
Application:	ELISA

### Product Details

Purpose:	Mouse PCNA Associated Factor ELISA Kit is an ELISA kit against Mouse PCNA Associated Factor (PAF).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric

### Target Details

Target:	KIAA0101 (PAF)
Alternative Name:	PCNA Clamp Associated Factor (PCLAF/KIAA0101) ( <a href="#">PAF Products</a> )
Pathways:	<a href="#">Chromatin Binding</a>

## Application Details

---

**Application Notes:**                      **Stability:** The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

**Recommended dilutions:** Optimal dilutions/concentrations should be determined by the end user.

---

**Plate:**                                              Pre-coated

---

**Restrictions:**                                      For Research Use only

---

## Handling

---

**Storage:**                                              4 °C/-20 °C

---

**Storage Comment:**                                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

**Expiry Date:**                                              6 months

---
