

## Datasheet for ABIN6206447 **NOG ELISA Kit**

[Go to Product page](#)

### Overview

Quantity:	96 tests
Target:	NOG
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	125 pg/mL - 8000 pg/mL
Minimum Detection Limit:	125 pg/mL
Application:	ELISA

### Product Details

Purpose:	Human Noggin ELISA Kit is an ELISA Kit against Noggin.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	75 pg/mL

### Target Details

Target:	NOG
Alternative Name:	Noggin ( <a href="#">NOG Products</a> )
Pathways:	<a href="#">Stem Cell Maintenance</a> , <a href="#">Tube Formation</a>

## Application Details

---

**Application Notes:**                      **Stability:** The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Lyophilized

---

**Plate:**                                      Pre-coated

---

**Restrictions:**                            For Research Use only

---

## Handling

---

**Storage:**                                   4 °C/-20 °C

---

**Storage Comment:**                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

**Expiry Date:**                            6 months

---
