## Datasheet for ABIN6207291 RAN ELISA Kit

### Overview

Quantity:	96 tests
Target:	RAN
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA

### Product Details

Purpose:	Human RAN ELISA Kit is an ELISA Kit against RAN.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 0.094 ng/mL

### Target Details

Target:	RAN
Alternative Name:	RAN ( <a href="#">RAN Products</a> )
UniProt:	<a href="#">P62826</a>
Pathways:	<a href="#">Regulatory RNA Pathways</a> , <a href="#">Intracellular Steroid Hormone Receptor Signaling Pathway</a> , <a href="#">Protein</a>

## Target Details

---

[targeting to Nucleus](#)

## Application Details

---

**Application Notes:** Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Lyophilized

---

**Plate:** Pre-coated

---

**Restrictions:** For Research Use only

## Handling

---

**Storage:** 4 °C/-20 °C

---

**Storage Comment:** Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

**Expiry Date:** 6 months
