**Osteoactivin ELISA Kit**

## Overview

Quantity:	96 tests
Target:	Osteoactivin (GPNMB)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA

## Product Details

Purpose:	Rat Transmembrane glycoprotein NMB ELISA Kit is an ELISA kit against Rat Transmembrane glycoprotein NMB (Gpnmb).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric

## Target Details

Target:	Osteoactivin (GPNMB)
Alternative Name:	Transmembrane glycoprotein NMB ( <a href="#">GPNMB Products</a> )

## Application Details

---

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
--------------------	---

---

Plate:	Pre-coated
--------	------------

---

Restrictions:	For Research Use only
---------------	-----------------------

---

## Handling

---

Storage:	4 °C/-20 °C
----------	-------------

---

Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
------------------	---

---

Expiry Date:	6 months
