

#### Datasheet for ABIN6210606

# **Cytokeratin 5 ELISA Kit**

#### Overview

| Quantity:                | 96 tests               |
|--------------------------|------------------------|
| Target:                  | Cytokeratin 5 (KRT5)   |
| Reactivity:              | Mouse                  |
| Method Type:             | Sandwich ELISA         |
| Detection Range:         | 0.312 ng/mL - 20 ng/mL |
| Minimum Detection Limit: | 0.312 ng/mL            |
| Application:             | ELISA                  |

### **Product Details**

| Purpose:           | Mouse Keratin, type II cytoskeletal 5 ELISA Kit is an ELISA kit against Mouse Keratin, type II cytoskeletal 5 (Krt5). |
|--------------------|-----------------------------------------------------------------------------------------------------------------------|
| Sample Type:       | Plasma, Serum                                                                                                         |
| Analytical Method: | Quantitative                                                                                                          |
| Detection Method:  | Colorimetric                                                                                                          |

# **Target Details**

| Target:           | Cytokeratin 5 (KRT5)                            |
|-------------------|-------------------------------------------------|
| Alternative Name: | Keratin, type II cytoskeletal 5 (KRT5 Products) |

# **Application Details**

| Application Notes: | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less |
|--------------------|-------------------------------------------------------------------------------------------------------|
|                    | than 5 % within the expiration date under appropriate storage conditions. To minimize                 |
|                    | performance fluctuations, operation procedures and lab conditions should be strictly controlled.      |
|                    | It is also strongly suggested that the whole assay is performed by the same user throughout.          |
|                    | Recommended dilutions: Optimal dilutions/concentrations should be determined by the end               |
|                    | user.                                                                                                 |
| Plate:             | Pre-coated                                                                                            |
| Restrictions:      | For Research Use only                                                                                 |
| Handling           |                                                                                                       |
| Storage:           | 4 °C/-20 °C                                                                                           |
| Storage Comment:   | Upon receipt, store the kit according to the storage instruction in the kit's manual.                 |
| Expiry Date:       | 6 months                                                                                              |
