

# Datasheet for ABIN6211432 **DBN1 ELISA Kit**

Overview

| Quantity:                | 96 tests               |
|--------------------------|------------------------|
| Target:                  | DBN1                   |
| Reactivity:              | Rat                    |
| Method Type:             | Sandwich ELISA         |
| Detection Range:         | 0.156 ng/mL - 10 ng/mL |
| Minimum Detection Limit: | 0.156 ng/mL            |
| Application:             | ELISA                  |

#### Product Details

| Purpose:           | Rat Drebrin 1 (DBN1) ELISA Kit is an ELISA Kit against DBN1. |
|--------------------|--------------------------------------------------------------|
| Sample Type:       | Tissue Homogenate                                            |
| Analytical Method: | Quantitative                                                 |
| Detection Method:  | Colorimetric                                                 |
| Sensitivity:       | < 0.051 ng/mL                                                |

## Target Details

| Target:           | DBN1                 |
|-------------------|----------------------|
| Alternative Name: | DBN1 (DBN1 Products) |
| Gene ID:          | 81                   |
| UniProt:          | Q07266               |

### Target Details

#### Pathways:

# Application Details

| Application Notes: | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less |
|--------------------|-------------------------------------------------------------------------------------------------------|
|                    | than 5 % within the expiration date under appropriate storage conditions. To minimize                 |
|                    | performance fluctuations, operation procedures and lab conditions should be strictly controlled.      |
|                    | It is also strongly suggested that the whole assay is performed by the same user throughout.          |
|                    | Recommended dilutions: Optimal dilutions/concentrations should be determined by the end               |
|                    | user.                                                                                                 |
|                    | Standard Form: Lyophilized                                                                            |
| Plate:             | Pre-coated                                                                                            |
| Restrictions:      | For Research Use only                                                                                 |
|                    |                                                                                                       |
| Handling           |                                                                                                       |
| Storage:           | 4 °C/-20 °C                                                                                           |
| Storage Comment:   | Upon receipt, store the kit according to the storage instruction in the kit's manual.                 |
