

## Datasheet for ABIN6217026

### FBP2 ELISA Kit

[Go to Product page](#)

#### Overview

|                          |                         |
|--------------------------|-------------------------|
| Quantity:                | 96 tests                |
| Target:                  | FBP2                    |
| Reactivity:              | Rat                     |
| Method Type:             | Sandwich ELISA          |
| Detection Range:         | 31.2 pg/mL - 2000 pg/mL |
| Minimum Detection Limit: | 31.2 pg/mL              |
| Application:             | ELISA                   |

#### Product Details

|                    |                                                                                                                               |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Purpose:           | Rat Fructose-1,6-bisphosphatase isozyme 2 ELISA Kit is an ELISA kit against Rat Fructose-1,6-bisphosphatase isozyme 2 (Fbp2). |
| Sample Type:       | Plasma, Serum                                                                                                                 |
| Analytical Method: | Quantitative                                                                                                                  |
| Detection Method:  | Colorimetric                                                                                                                  |

#### Target Details

|                   |                                                                         |
|-------------------|-------------------------------------------------------------------------|
| Target:           | FBP2                                                                    |
| Alternative Name: | Fructose-1,6-bisphosphatase isozyme 2 ( <a href="#">FBP2 Products</a> ) |

## Application Details

---

Application Notes:                      Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

---

Plate:                                      Pre-coated

---

Restrictions:                            For Research Use only

---

## Handling

---

Storage:                                  4 °C/-20 °C

---

Storage Comment:                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

Expiry Date:                              6 months

---
