SLC27A5 CLIA Kit

_					
	W	0	rv	10	W

Alternative Name:

Quantity:	96 tests
Target:	SLC27A5
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Fatty Acid Transport Protein 5 (FATP5) CLIA Kit is a Sandwich CLIA Kit for use with
Purpose:	Human Fatty Acid Transport Protein 5 (FATP5) CLIA Kit is a Sandwich CLIA Kit for use with Tissue homogenates and other biological fluids.
Purpose: Sample Type:	
	Tissue homogenates and other biological fluids.
Sample Type:	Tissue homogenates and other biological fluids. Tissue Homogenate
Sample Type: Analytical Method:	Tissue homogenates and other biological fluids. Tissue Homogenate Quantitative
Sample Type: Analytical Method: Detection Method:	Tissue homogenates and other biological fluids. Tissue Homogenate Quantitative Chemiluminescent
Sample Type: Analytical Method: Detection Method: Sensitivity:	Tissue homogenates and other biological fluids. Tissue Homogenate Quantitative Chemiluminescent

Fatty Acid Transport Protein 5 (FATP5) (SLC27A5 Products)

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less		
	than 5 % within the expiration date under appropriate storage conditions. To minimize		
	performance fluctuations, operation procedures and lab conditions should be strictly controlled.		
	It is also strongly suggested that the whole assay is performed by the same user throughout.		
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end		
	user.		
	Standard Form: Lyophilized		
Plate:	Pre-coated		
Restrictions:	For Research Use only		
Handling			
Storage:	4 °C/-20 °C		
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.		
Expiry Date:	6 months
