Haptoglobin beta Chain (HP) ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	Haptoglobin beta Chain (HP)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.781 ng/mL - 50 ng/mL
Minimum Detection Limit:	0.781 ng/mL
Application:	ELISA

Product Details

Purpose:	Human Zonulin ELISA Kit is an ELISA Kit against Zonulin.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.469 ng/mL

Target Details

Target:	Haptoglobin beta Chain (HP)
Alternative Name:	Haptoglobin beta (HP Products)

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
--------------------	---

Plate:	Pre-coated
--------	------------

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Storage:	4 °C/-20 °C
----------	-------------

Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
