Lacritin CLIA Kit

Overview

Abstract:

Quantity:	96 tests
Target:	Lacritin (LACRT)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Lacritin (LACRT) CLIA Kit is a Sandwich CLIA Kit for use with Saliva, tears and other
Purpose:	Human Lacritin (LACRT) CLIA Kit is a Sandwich CLIA Kit for use with Saliva, tears and other biological fluids.
Purpose: Sample Type:	
	biological fluids.
Sample Type:	biological fluids. Saliva, Tears
Sample Type: Analytical Method:	biological fluids. Saliva, Tears Quantitative
Sample Type: Analytical Method: Detection Method:	biological fluids. Saliva, Tears Quantitative Chemiluminescent
Sample Type: Analytical Method: Detection Method: Sensitivity:	biological fluids. Saliva, Tears Quantitative Chemiluminescent

LACRT Products

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less
	than 5 % within the expiration date under appropriate storage conditions. To minimize
	performance fluctuations, operation procedures and lab conditions should be strictly controlled.
	It is also strongly suggested that the whole assay is performed by the same user throughout.
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end
	user.
	Standard Form: Lyophilized
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
