

Datasheet for ABIN6229804 **SLC27A1 ELISA Kit**

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	SLC27A1 (FATP1)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA

Product Details

Purpose:	Human Long-chain fatty acid transport protein 1 ELISA Kit is an ELISA kit against Human Long-chain fatty acid transport protein 1 (SLC27A1).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric

Target Details

Target:	SLC27A1 (FATP1)
Alternative Name:	Long-chain fatty acid transport protein 1 (FATP1 Products)
Pathways:	Inositol Metabolic Process , Regulation of Lipid Metabolism by PPARAlpha

Application Details

Application Notes: **Stability:** The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
