## **Application Details**

| Application Notes: | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less |  |
|--------------------|---|--|
|                    | than 5 % within the expiration date under appropriate storage conditions. To minimize                 |  |
|                    | performance fluctuations, operation procedures and lab conditions should be strictly controlled.      |  |
|                    | It is also strongly suggested that the whole assay is performed by the same user throughout.          |  |
|                    | Recommended dilutions: Optimal dilutions/concentrations should be determined by the end               |  |
|                    | user.   |  |
|                    | Standard Form: Lyophilized  |  |
| Plate:             | Pre-coated  |  |
