

## Datasheet for ABIN6231573 PPARD ELISA Kit

[Go to Product page](#)

### Overview

Quantity: 96 tests

Target: PPARD

Reactivity: Pig

Method Type: Sandwich ELISA

Detection Range: 0.156 ng/mL - 10 ng/mL

Minimum Detection Limit: 0.156 ng/mL

Application: ELISA

### Product Details

Purpose: Pig PPAR delta ELISA Kit is an ELISA Kit against Peroxisome Proliferator Activated Receptor Delta (PPARD).

Sample Type: Plasma, Serum

Analytical Method: Quantitative

Detection Method: Colorimetric

Sensitivity: 0.094 ng/mL

### Target Details

Target: PPARD

Alternative Name: Peroxisome Proliferator Activated Receptor Delta ([PPARD Products](#))

Pathways: [Nuclear Receptor Transcription Pathway](#), [Positive Regulation of Peptide Hormone Secretion](#),

## Target Details

---

Steroid Hormone Mediated Signaling Pathway, Monocarboxylic Acid Catabolic Process, Smooth Muscle Cell Migration, Positive Regulation of fat Cell Differentiation

## Application Details

---

**Application Notes:** Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

---

**Plate:** Pre-coated

---

**Restrictions:** For Research Use only

## Handling

---

**Storage:** 4 °C/-20 °C

---

**Storage Comment:** Upon receipt, store the kit according to the storage instruction in the kit's manual.
