

## Datasheet for ABIN6233089 Otoraplin ELISA Kit

[Go to Product page](#)

### Overview

Quantity:	96 tests
Target:	Otoraplin (OTOR)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.313 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.313 ng/mL
Application:	ELISA

### Product Details

Purpose:	Human OTOR ELISA Kit is an ELISA Kit against OTOR.
Sample Type:	Plasma, Serum, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 0.188 ng/mL

### Target Details

Target:	Otoraplin (OTOR)
Alternative Name:	OTOR ( <a href="#">OTOR Products</a> )
UniProt:	<a href="#">Q9NRC9</a>
Pathways:	<a href="#">Sensory Perception of Sound, Regulation of Carbohydrate Metabolic Process</a>

## Application Details

---

**Application Notes:**                      **Stability:** The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. **Recommended dilutions:** Optimal dilutions/concentrations should be determined by the end user.  
**Standard Form:** Lyophilized

---

**Plate:**    Pre-coated

---

**Restrictions:**                                      For Research Use only

---

## Handling

---

**Storage:**    4 °C/-20 °C

---

**Storage Comment:**                                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

**Expiry Date:**    6 months

---
