

Datasheet for ABIN6234775 **C20orf149 ELISA Kit**

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	C20orf149 (PPDPF)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA

Product Details

Purpose:	Human Pancreatic progenitor cell differentiation and proliferation factor (PPDPF) ELISA Kit is an ELISA Kit against Pancreatic progenitor cell differentiation and proliferation factor (PPDPF).
Sample Type:	Plasma, Serum, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 0.094 ng/mL

Target Details

Target:	C20orf149 (PPDPF)
Alternative Name:	Pancreatic progenitor cell differentiation and proliferation factor (PPDPF) (PPDPF Products)
UniProt:	Q9H3Y8

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
--------------------	---

Plate:	Pre-coated
--------	------------

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Storage:	4 °C/-20 °C
----------	-------------

Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
------------------	---

Expiry Date:	6 months
