Hemoglobin Subunit beta ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	Hemoglobin Subunit beta (HBB)
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	0.78 ng/mL - 50 ng/mL
Minimum Detection Limit:	0.78 ng/mL
Application:	ELISA

Product Details

Purpose:	Mouse Hemoglobin subunit beta-1 ELISA Kit is an ELISA kit against Mouse Hemoglobin subunit beta-1 (Hbb-b1).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 0.448 ng/mL

Target Details

Target:	Hemoglobin Subunit beta (HBB)
Alternative Name:	Hemoglobin subunit beta-1 (HBB Products)
Target Type:	Viral Protein

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
