Quantity:	100 tests
Target:	CD73 (NT5E)
Reactivity:	Human, Non-Human Primate
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD73 antibody is conjugated to APC
Application:	Flow Cytometry (FACS)

## **Product Details**

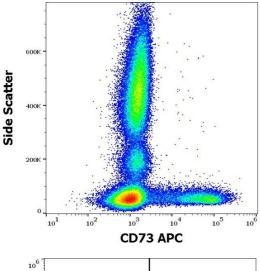

Immunogen:	pre-B leukemia cells
Clone:	AD2
Isotype:	IgG1 kappa
Specificity:	The mouse monoclonal antibody AD2 recognizes CD73, a 70 kDa GPI-anchored 5'-nucleotidase expressed predominantly on the surface of T and B cell subsets, follicular dendritic cells and endothelial cells.
Cross-Reactivity (Details):	Human
Purification:	Purified antibody is conjugated with activated allophycocyanin (APC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

# Target Details

Target:	CD73 (NT5E)	
Alternative Name:	CD73 (NT5E Products)	
Background:	5'-nucleotidase ecto,CD73 (ecto-5'-nucleotidase) is a 70 kDa glycoprotein anchored to the	
	extracellular leaflet of the plasma membrane by GPI. This ecto-enzyme catalyzes	
	dephosphorylation of AMP to adenosine. CD73 is expressed in various types of cells, such as	
	epithelial, muscle, and endothelial cells, neutrophils, lymphocytes and fibroblasts. Inflammatory	
	mediators support CD73 expression and its enzymatic activity, leading to the release of	
	adenosine, which modulates inflammation through adenosine receptors. CD73 is expressed in	
	a variety of lymphomas and leukemias, including ALL and CLL, whereas immunodeficient	
	patients usually express low levels of this protein.,ecto-5'nucleotidase, NT5E, E5NT, CALJA,	
	NTE	
Gene ID:	4907	
UniProt:	P21589	
Pathways:	Synaptic Membrane, Ribonucleoside Biosynthetic Process	
Application Details		
Application Notes:	Flow cytometry: The reagent is designed for analysis of human blood cells using 10 µL reagent	
	/ 100 $\mu L$ of whole blood or $10^6$ cells in a suspension. The content of a vial (1 ml) is sufficient for	
	100 tests.	
Comment:	The purified antibody is conjugated with cross-linked Allophycocyanin (APC) under optimum	
	conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct	
	use. No reconstitution is necessary.	
Restrictions:	For Research Use only	
Handling		
Buffer:	Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which	
	should be handled by trained staff only.	
Handling Advice:	The purified antibody is conjugated with cross-linked Allophycocyanin (APC) under optimum	
	conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct	

	use. No reconstitution is necessary.
Storage:	4 °C
Storage Comment:	Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze

### **Images**

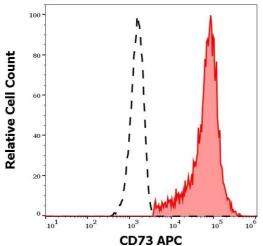

## **Flow Cytometry**

**Image 1.** Flow cytometry surface staining pattern of human peripheral whole blood stained using anti-human CD73 (AD2) APC antibody (10  $\mu$ L reagent / 100  $\mu$ L of peripheral whole blood).

### **Flow Cytometry**

**Image 2.** Flow cytometry multicolor surface staining pattern of human lymphocytes using anti-human CD73 (AD2) APC antibody (10  $\mu$ L reagent / 100  $\mu$ L of peripheral whole blood) and anti-human CD19 (LT19) PE antibody(20  $\mu$ L reagent / 100  $\mu$ L of peripheral whole blood).

#### **Flow Cytometry**

**Image 3.** Separation of human CD73 positive CD19 positive B cells (red-filled) from neutrophil granulocytes (black-dashed) in flow cytometry analysis (surface staining) of human peripheral whole blood stained using anti-human CD73 (AD2) APC antibody ( $10 \, \mu L$  reagent /  $100 \, \mu L$  of peripheral whole blood).
