Target Details

Target:	TBL1XR1
Alternative Name:	TBLR1 ( <a href="#">TBL1XR1 Products</a> )
Background:	F-box-like protein involved in the recruitment of the ubiquitin/19S proteasome complex to nuclear receptor-regulated transcription units. Plays an essential role in transcription activation mediated by nuclear receptors. Probably acts as integral component of the N-Cor corepressor complex that mediates the recruitment of the 19S proteasome complex, leading to the subsequent proteasomal degradation of N-Cor complex, thereby allowing cofactor exchange, and transcription activation.
UniProt:	<a href="#">Q9BZK7</a>
