Target:

| Quantity: | 100 μL |
|----------------------|--|
| Target: | MAPKAP Kinase 5 (MAPKAPK5) |
| Binding Specificity: | pThr182 |
| Reactivity: | Human, Mouse, Rat |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Conjugate: | This MAPKAP Kinase 5 antibody is un-conjugated |
| Application: | Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC) |
| | inimunocytochemistry (ico) |
| Product Details | |
| Immunogen: | A synthesized peptide derived from human MAPKAPK5 around the phosphorylation site of Thr182. |
| Isotype: | IgG |
| Specificity: | Phospho-MAPKAPK5 (Thr182) Antibody detects endogenous levels of MAPKAPK5 only when |
| | phosphorylated at Threonine 182. |
| Purification: | The antibody is from purified rabbit serum by affinity purification via sequential |
| | chromatography on phospho- and non-phospho-peptide affinity columns. |
| Target Details | |

MAPKAP Kinase 5 (MAPKAPK5)

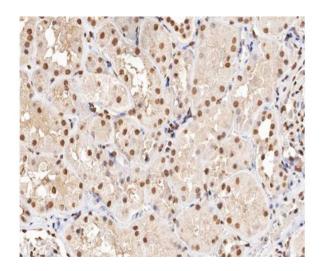

Target Details

| Alternative Name: | MAPKAPK5 (MAPKAPK5 Products) |
|---------------------|--|
| Background: | Description: Tumor suppressor serine/threonine-protein kinase involved in mTORC1 signaling |
| | and post-transcriptional regulation. Phosphorylates FOXO3, ERK3/MAPK6, ERK4/MAPK4, |
| | HSP27/HSPB1, p53/TP53 and RHEB. Acts as a tumor suppressor by mediating Ras-induced |
| | senescence and phosphorylating p53/TP53. Involved in post-transcriptional regulation of MYC |
| | by mediating phosphorylation of FOXO3: phosphorylation of FOXO3 leads to promote nuclear |
| | localization of FOXO3, enabling expression of miR-34b and miR-34c, 2 post-transcriptional |
| | regulators of MYC that bind to the 3'UTR of MYC transcript and prevent MYC translation. Acts |
| | as a negative regulator of mTORC1 signaling by mediating phosphorylation and inhibition of |
| | RHEB. Part of the atypical MAPK signaling via its interaction with ERK3/MAPK6 or |
| | ERK4/MAPK4: the precise role of the complex formed with ERK3/MAPK6 or ERK4/MAPK4 is |
| | still unclear, but the complex follows a complex set of phosphorylation events: upon interaction |
| | with atypical MAPK (ERK3/MAPK6 or ERK4/MAPK4), ERK3/MAPK6 (or ERK4/MAPK4) is |
| | phosphorylated and then mediates phosphorylation and activation of MAPKAPK5, which in turn |
| | phosphorylates ERK3/MAPK6 (or ERK4/MAPK4). Mediates phosphorylation of HSP27/HSPB1 |
| | in response to PKA/PRKACA stimulation, inducing F-actin rearrangement. |
| | Gene: MAPKAPK5 |
| Molecular Weight: | 60kDa |
| Gene ID: | 8550 |
| UniProt: | Q8IW41 |
| Pathways: | MAPK Signaling |
| Application Details | |
| Application Notes: | WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:100-1:500, ELISA(peptide) 1:20000-1:40000 |
| Restrictions: | For Research Use only |
| Handling | |
| Format: | Liquid |
| Concentration: | 1 mg/mL |
| Buffer: | Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % |
| | glycerol. |
| | Sodium azide |

Handling

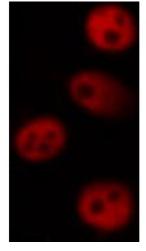

| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
|--------------------|--|
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C. Stable for 12 months from date of receipt. |
| Expiry Date: | 12 months |

Images

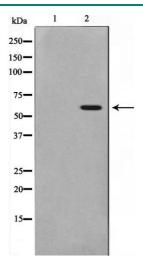

Immunohistochemistry

Image 1. ABIN6266470 at 1/200 staining human kidney tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.

Immunofluorescence (fixed cells)

Image 2. ABIN6266470 staining K562 by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.

Western Blotting

Image 3. Western blot analysis on K562 cell lysate using Phospho-MAPKAPK5(Thr182) Antibody,The lane on the left is treated with the antigen-specific peptide.
