|--------|-----------|------|----|---|
|        | $ V \cap$ | r\/I | 19 | ٨ |

| Quantity:            | 100 μL   |  |
|----------------------|--|--|
| Target:              | KIT  |  |
| Binding Specificity: | pTyr721  |  |
| Reactivity:          | Human, Mouse, Rat  |  |
| Host:                | Rabbit   |  |
| Clonality:           | Polyclonal   |  |
| Conjugate:           | This KIT antibody is un-conjugated   |  |
| Application:         | ELISA, Western Blotting (WB), Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC) |  |
|                      |  |  |

#### **Product Details**

| Immunogen:  | A synthesized peptide derived from human c-Kit around the phosphorylation site of Tyr721.                    |
|---|--|
| Isotype:  | IgG  |
| Specificity:  | Phospho-c-Kit (Tyr721) Antibody detects endogenous levels of c-Kit only when phosphorylated at Tyrosine 721. |
| Predicted Reactivity:   | Pig,Bovine,Horse,Rabbit,Dog  |
| Purification: The antibody is from purified rabbit serum by affinity purification via sequential chromatography on phospho- and non-phospho-peptide affinity columns. |  |

## **Target Details**

| Target: KIT |

# **Target Details**

| Alternative Name:   | KIT (KIT Products)   |  |
|---------------------|--|--|
|                     |  |  |
| Background:         | Description: Tyrosine-protein kinase that acts as cell-surface receptor for the cytokine           |  |
|                     | KITLG/SCF and plays an essential role in the regulation of cell survival and proliferation,        |  |
|                     | hematopoiesis, stem cell maintenance, gametogenesis, mast cell development, migration and          |  |
|                     | function, and in melanogenesis. In response to KITLG/SCF binding, KIT can activate several         |  |
|                     | signaling pathways. Phosphorylates PIK3R1, PLCG1, SH2B2/APS and CBL. Activates the AKT1            |  |
|                     | signaling pathway by phosphorylation of PIK3R1, the regulatory subunit of phosphatidylinositol     |  |
|                     | 3-kinase. Activated KIT also transmits signals via GRB2 and activation of RAS, RAF1 and the        |  |
|                     | MAP kinases MAPK1/ERK2 and/or MAPK3/ERK1. Promotes activation of STAT family                       |  |
|                     | members STAT1, STAT3, STAT5A and STAT5B. Activation of PLCG1 leads to the production of            |  |
|                     | the cellular signaling molecules diacylglycerol and inositol 1,4,5-trisphosphate. KIT signaling is |  |
|                     | modulated by protein phosphatases, and by rapid internalization and degradation of the             |  |
|                     | receptor. Activated KIT promotes phosphorylation of the protein phosphatases PTPN6/SHP-1           |  |
|                     | and PTPRU, and of the transcription factors STAT1, STAT3, STAT5A and STAT5B. Promotes              |  |
|                     | phosphorylation of PIK3R1, CBL, CRK (isoform Crk-II), LYN, MAPK1/ERK2 and/or MAPK3/ERK1            |  |
|                     | PLCG1, SRC and SHC1.   |  |
|                     | Gene: KIT  |  |
| Molecular Weight:   | 120,145kDa   |  |
| Gene ID:            | 3815   |  |
| UniProt:            | P10721   |  |
| Pathways:           | RTK Signaling, Fc-epsilon Receptor Signaling Pathway, EGFR Signaling Pathway, Neurotrophin         |  |
|                     | Signaling Pathway, Sensory Perception of Sound, Stem Cell Maintenance, Production of               |  |
|                     | Molecular Mediator of Immune Response, Regulation of long-term Neuronal Synaptic Plasticity        |  |
| Application Details |  |  |
| Application Notes:  | WB 1:500-1:2000, IHC 1:100-1:500, IF/ICC 1:100-1:500, ELISA(peptide) 1:20000-1:40000               |  |
| Restrictions:       | For Research Use only  |  |
| Handling            |  |  |
| Format:             | Liquid   |  |
| Concentration:      | 1 mg/mL  |  |
| Buffer:             | Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 %        |  |
|                     |  |  |

#### Handling

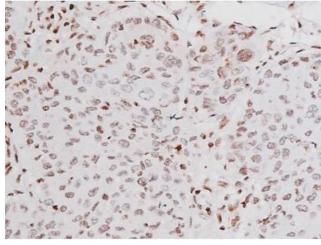

|                    | glycerol.  |
|--------------------|--|
| Preservative:      | Sodium azide   |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C   |
| Storage Comment:   | Store at -20 °C. Stable for 12 months from date of receipt.  |
| Expiry Date:       | 12 months  |

#### **Images**

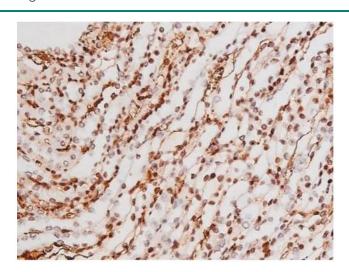

# Immunofluorescence (fixed cells)

**Image 1.** ABIN6267365 staining HepG2 by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.

#### **Immunohistochemistry**

**Image 2.** ABIN6267365 at 1/200 staining Human lung cancer tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.

## **Immunohistochemistry**

**Image 3.** ABIN6267365 at 1/200 staining Mouse kidney tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.

Please check the product details page for more images. Overall 14 images are available for ABIN6256004.
