| Quantity:            | 100 μL   |  |
|----------------------|--|--|
| Target:              | RUNX1  |  |
| Binding Specificity: | pSer304  |  |
| Reactivity:          | Human, Mouse, Rat  |  |
| Host:                | Rabbit   |  |
| Clonality:           | Polyclonal   |  |
| Conjugate:           | This RUNX1 antibody is un-conjugated   |  |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC) |  |

#### **Product Details**

| Immunogen:            | A synthesized peptide derived from human RUNX1 / AML1 around the phosphorylation site of Ser304.  |
|-----------------------|---|
| Isotype:              | IgG   |
| Specificity:          | Phospho-RUNX1 / AML1 (Ser304) Antibody detects endogenous levels of RUNX1 / AML1 only when phosphorylated at Serine 304.                                |
| Predicted Reactivity: | Bovine, Horse, Sheep, Rabbit, Dog, Chicken, Xenopus   |
| Purification:         | The antibody is from purified rabbit serum by affinity purification via sequential chromatography on phospho- and non-phospho-peptide affinity columns. |

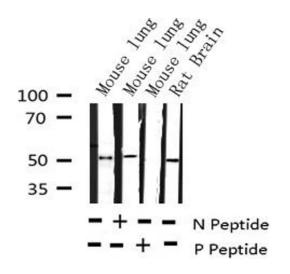

## **Target Details**

| l arget Details     |   |  |
|---------------------|---|--|
| Target:             | RUNX1   |  |
| Alternative Name:   | RUNX1 (RUNX1 Products)  |  |
| Background:         | Description: Forms the heterodimeric complex core-binding factor (CBF) with CBFB. RUNX            |  |
|                     | members modulate the transcription of their target genes through recognizing the core             |  |
|                     | consensus binding sequence 5'-TGTGGT-3', or very rarely, 5'-TGCGGT-3', within their regulatory    |  |
|                     | regions via their runt domain, while CBFB is a non-DNA-binding regulatory subunit that            |  |
|                     | allosterically enhances the sequence-specific DNA-binding capacity of RUNX. The heterodimer       |  |
|                     | bind to the core site of a number of enhancers and promoters, including murine leukemia virus     |  |
|                     | polyomavirus enhancer, T-cell receptor enhancers, LCK, IL3 and GM-CSF promoters (Probable)        |  |
|                     | Essential for the development of normal hematopoiesis (PubMed:17431401). Acts                     |  |
|                     | synergistically with ELF4 to transactivate the IL-3 promoter and with ELF2 to transactivate the   |  |
|                     | BLK promoter (PubMed:10207087, PubMed:14970218). Inhibits KAT6B-dependent                         |  |
|                     | transcriptional activation (By similarity). Involved in lineage commitment of immature T cell     |  |
|                     | precursors. CBF complexes repress ZBTB7B transcription factor during cytotoxic (CD8+) T cell      |  |
|                     | development. They bind to RUNX-binding sequence within the ZBTB7B locus acting as                 |  |
|                     | transcriptional silencer and allowing for cytotoxic T cell differentiation. CBF complexes binding |  |
|                     | to the transcriptional silencer is essential for recruitment of nuclear protein complexes that    |  |
|                     | catalyze epigenetic modifications to establish epigenetic ZBTB7B silencing (By similarity).       |  |
|                     | Controls the anergy and suppressive function of regulatory T-cells (Treg) by associating with     |  |
|                     | FOXP3. Activates the expression of IL2 and IFNG and down-regulates the expression of              |  |
|                     | TNFRSF18, IL2RA and CTLA4, in conventional T-cells (PubMed:17377532). Positively regulates        |  |
|                     | the expression of RORC in T-helper 17 cells (By similarity).                                      |  |
|                     | Gene: RUNX1   |  |
| Molecular Weight:   | 50kDa   |  |
| Gene ID:            | 861   |  |
| UniProt:            | Q01196  |  |
| Application Details |   |  |
| Application Notes:  | WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:100-1:500, ELISA(peptide) 1:20000-1:40000               |  |
| Restrictions:       | For Research Use only   |  |
| Handling            |   |  |
| Format:             | Liquid  |  |
|                     |   |  |

#### Handling

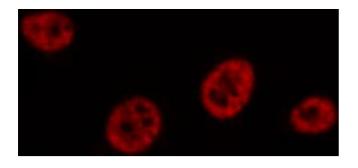

| Concentration:     | 1 mg/mL  |
|--------------------|--|
| Buffer:            | Rabbit lgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.                  |
| Preservative:      | Sodium azide   |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C   |
| Storage Comment:   | Store at -20 °C. Stable for 12 months from date of receipt.  |
| Expiry Date:       | 12 months  |

#### **Images**

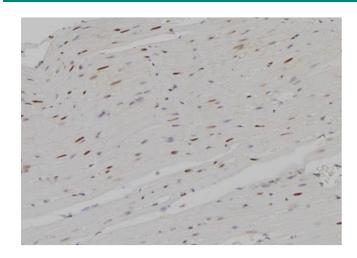

#### **Western Blotting**

**Image 1.** Western blot analysis of Phospho-AML1 (Ser303) expression in various lysates

#### Immunofluorescence (fixed cells)

**Image 2.** ABIN6267588 staining Hela by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.

### Immunohistochemistry

**Image 3.** ABIN6267588 at 1/100 staining Rat heart tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.

Please check the product details page for more images. Overall 5 images are available for ABIN6256258.
