	1//	Д	r۱	/1	$\triangle$	٨

Quantity:	100 μL
Target:	Integrin beta 3 (ITGB3)
Binding Specificity:	pTyr773
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB), Immunohistochemistry (IHC), ELISA, Immunofluorescence (IF), Immunocytochemistry (ICC)
Product Details	
Product Details Immunogen:	A synthesized peptide derived from human Integrin beta3 around the phosphorylation site of Tyr773.
Immunogen:	Tyr773.
Immunogen:	Tyr773.  IgG  Phospho-Integrin beta3 (Tyr773) Antibody detects endogenous levels of Integrin beta3 only

# **Target Details**

Target: Integrin beta 3 (ITGB3)

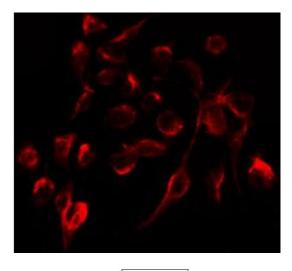

chromatography on phospho- and non-phospho-peptide affinity columns.

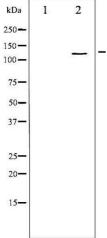

Alternative Name:	ITGB3 (ITGB3 Products)	
Background:	Description: Integrin alpha-V/beta-3 (ITGAV:ITGB3) is a receptor for cytotactin, fibronectin,	
	laminin, matrix metalloproteinase-2, osteopontin, osteomodulin, prothrombin, thrombospondin,	
	vitronectin and von Willebrand factor. Integrin alpha-IIb/beta-3 (ITGA2B:ITGB3) is a receptor for	
	fibronectin, fibrinogen, plasminogen, prothrombin, thrombospondin and vitronectin. Integrins	
	alpha-IIb/beta-3 and alpha-V/beta-3 recognize the sequence R-G-D in a wide array of ligands.	
	Integrin alpha-IIb/beta-3 recognizes the sequence H-H-L-G-G-G-A-K-Q-A-G-D-V in fibrinogen	
	gamma chain. Following activation integrin alpha-IIb/beta-3 brings about platelet/platelet	
	interaction through binding of soluble fibrinogen. This step leads to rapid platelet aggregation	
	which physically plugs ruptured endothelial surface. Fibrinogen binding enhances SELP	
	expression in activated platelets (By similarity). ITGAV:ITGB3 binds to fractalkine (CX3CL1) and	
	acts as its coreceptor in CX3CR1-dependent fractalkine signaling (PubMed:23125415,	
	PubMed:24789099). ITGAV:ITGB3 binds to NRG1 (via EGF domain) and this binding is essentia	
	for NRG1-ERBB signaling (PubMed:20682778). ITGAV:ITGB3 binds to FGF1 and this binding is	
	essential for FGF1 signaling (PubMed:18441324). ITGAV:ITGB3 binds to FGF2 and this binding	
	is essential for FGF2 signaling (PubMed:28302677). ITGAV:ITGB3 binds to IGF1 and this	
	binding is essential for IGF1 signaling (PubMed:19578119). ITGAV:ITGB3 binds to IGF2 and this	
	binding is essential for IGF2 signaling (PubMed:28873464). ITGAV:ITGB3 binds to IL1B and this	
	binding is essential for IL1B signaling (PubMed:29030430). ITGAV:ITGB3 binds to PLA2G2A via	
	a site (site 2) which is distinct from the classical ligand-binding site (site 1) and this induces	
	integrin conformational changes and enhanced ligand binding to site 1 (PubMed:18635536,	
	PubMed:25398877). ITGAV:ITGB3 acts as a receptor for fibrillin-1 (FBN1) and mediates R-G-D-	
	dependent cell adhesion to FBN1 (PubMed:12807887).	
	Gene: ITGB3	
Molecular Weight:	130kDa	
Gene ID:	3690	
UniProt:	P05106	
Pathways:	Regulation of G-Protein Coupled Receptor Protein Signaling, Signaling Events mediated by	
	VEGFR1 and VEGFR2, Smooth Muscle Cell Migration, Integrin Complex	
Application Details		
Application Notes:	WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:100-1:500, ELISA(peptide) 1:20000-1:40000	
Restrictions:	For Research Use only	

## Handling

Format:	Liquid
Concentration:	1 mg/mL
Buffer:	Rabbit IgG in phosphate buffered saline, pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20 °C. Stable for 12 months from date of receipt.
Expiry Date:	12 months

#### Immunofluorescence (fixed cells)

**Image 1.** ABIN6267299 staining HepG2 by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.

#### **Western Blotting**

**Image 2.** Western blot analysis of Integrin beta3 phosphorylation expression in H2O2 treated 293 whole cell lysates, The lane on the left is treated with the antigenspecific peptide.

## **Immunohistochemistry**

**Image 3.** ABIN6267299 at 1/200 staining human Fallopian tube sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the antibody for 1.5 hours at 22° C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.
